<i>The data columns on the left show monthly operations (ops) figures from FAA's ATADS system. Local Ops (LCL) are purple. The '%LCL' column provides an indicator of intensity for closed pattern operations, mostly for flight schools and recreational flying. The 'Running 12-Month' columns show totals for the most recent twelve months, and smooths out the trend. Percentages in the 'Change' columns compare the current 'Running 12-Month' total with the same total one year earlier. A color-scale is applied to key metrics; red indicates higher noise impact intensity (more ops), green indicates lower noise (less ops).</i>
